

FPT DRIVELINE

To satisfy a complete offer of powertrain solutions for On-Road market, FPT develops and manufactures high performance axles for all commercial categories, from heavy trucks off highway vehicles to light trucks, in urban areas or overland, from delivery to long haul.

From 70's to nowadays FPT has continuously improved driveline products, and today produces 1 axle/transmission every two minutes.

Axles products with GAW from 2,4 to 32 tons and GVW from 3,5 to 40 ton, are designed to maximize duration and load with minimum weight and maximum efficiency.

SPECIFICATIONS

Model:	4511
Application:	 Light Trucks
Type:	Rear Axle

GAW (ton):	3,7
GVW (ton):	5
Brake System:	Disc
Oil quantity (l):	1,9
Weight (kg):	166
Axle ratio range:	2,93 – 5,86

LEGEND

S	Solo	SR	Single Reduction
T	Tandem	HR	Hub Reduction
