

FPT INDUSTRIAL TO PROVIDE HIGH-PERFORMANCE BATTERY PACKS TO IVECO BUS TO SUPPORT EVER-MORE SUSTAINABLE MOBILITY

Turin, Italy, January 31st, 2023

FPT Industrial, the world-leading manufacturer of low-environmental-impact mobility solutions, will be supplying up to **500 high-performance battery packs** to sister company IVECO BUS to equip its **fleet of E-WAY full-electric 18 m articulated city buses to be delivered in Belgium**, following a recently signed framework agreement with the Flemish government-owned public transport enterprise De Lijn.

The vehicles will be deployed in several cities in Flanders, with **deliveries beginning in 2024** - first batch of 65 vehicles - and potentially continuing over six years. They will represent the **largest fleet of IVECO BUS articulated electric buses in operation**.

Produced at FPT Industrial's **new carbon-neutral ePowertrain Plant in Turin** (Italy), the Brand's battery packs have been developed for LCVs, minibuses and bus applications. **The new production site is the first totally carbon-neutral Iveco Group plant**, achieving its targets by offsetting its CO₂ emissions with the purchase of energy from renewable sources and carbon credits.

PRESS RELEASE

Battery pack on display at IAA fair

The **69 kWh FPT Battery Pack** for bus applications for IVECO BUS is a **modular battery pack** offering **impressive energy density, for best-in-class performance in city bus applications**. Thanks in no small part to NMC (Lithium Nickel Cobalt Manganese) technology, the most versatile, powerful, and high-performance solution to date, the eBS 69 offers **quick charging/discharging times**.

The high flexibility and modular solutions make **FPT battery packs adaptable to different applications, from urban to intercity buses**.

In addition to battery packs, the ePowertrain Plant also produces electric axles for heavy commercial vehicles, and electric central drives for LCVs, representing another important milestone for FPT Industrial's decarbonization path and for its strategy of achieving net-zero emissions for its products and all its industrial activities.

***FPT Industrial** is a brand of Iveco Group (IVG: MI), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across eleven production sites and eleven R&D centers work for FPT Industrial all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department supports all Brand customers. The extensive product offering includes six engine ranges with power outputs from 42 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path*

towards net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.
