

FPT INDUSTRIAL NORTH AMERICA ANNOUNCES NEW DISTRIBUTION PARTNER FOR PUERTO RICO AND THE CARIBBEAN

Burr Ridge, August 29th, 2023

FPT Industrial has announced a **new partnership with RK Power in Puerto Rico** as a distributor of **engines for power generation, construction, and industrial applications** throughout Puerto Rico and the Caribbean.

*“FPT Industrial is pleased to welcome RK Power to our industrial distribution network in North America,” said **Braden Cammauf**, Vice President FPT Industrial North America. “RK Power brings over 17 years of experience in manufacturing generators powered by diesel engines. Their leadership team and employees demonstrate an outstanding commitment to high-quality products and customer service that stands out among competitors. We look forward to growing our business and empowering the region of Puerto Rico and the entire Caribbean together.”*

RK Power provides energy solutions throughout the entire American continent. Among these solutions, the company specializes in the design, manufacturing, and commercialization of **electric generators and automatic transfers for residential, commercial, and industrial use in Puerto Rico, the Caribbean, and America.** Additionally, RK Power offers **emergency electric supply services.** Headquartered in San Juan, Puerto Rico, and founded in 2005, it is the only generator manufacturer in the Caribbean with two plants located in San Juan - Puerto Rico, and San Pedro De Macorís - Dominican Republic. For these reasons and more, RK Power

is an excellent partner to collaborate with FPT Industrial, as the brand strives to **exceed its customers' expectations by applying cutting-edge technology to meet specific energy requirements.**

“We are delighted and committed to having RK Power become part of the FPT Industrial family,” said **Mónica Ponce**, Corporate Marketing Director of RK Power. *“With FPT Industrial's complete line of industrial engines and our expertise in generator manufacturing, we see great growth potential in the markets we operate.”*

Amós Leiva, Business Developer, added: *“It is a significant investment we have made, as RK Power's policy has always been to establish long-term relationships with its strategic suppliers. From today onwards, we have FPT Industrial on board to develop many mutually beneficial businesses, allowing both of us to grow together, knowing that they will provide us with the best support and everything we need to make history together.”*

FPT Industrial manufactures over **600,000 engines globally each year**. The Brand's broad lineup of diesel engines stands out due to **compact designs** that offer **flexibility** with a wide range of options, and technological benefits such as DPF-free after-treatment systems, **reduced fuel consumption, long maintenance intervals for reduced costs, and high performance guaranteed in all conditions**. The Brand's portfolio comprises **power generation engines for both unregulated and regulated markets**. For the North American market, FPT Industrial provides dedicated solutions with Tier 4 Final no-DPF technology (HI-eSCR system), while global applications are addressed with integrated HI-eSCR2 system compliant with the more stringent EU Stage V regulation and dual-certified for Tier 4 Final.

Besides ensuring **compliance with the emissions standards**, this technology is the result of the Brand's experience of **more than 25 years in SCR solutions development** – FPT Industrial has already sold more than one million SCR units worldwide.

FPT Industrial is a brand of Iveco Group (IVG: MI), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and eleven R&D centers work for FPT Industrial all around the world. Active in nearly 100 countries, its global sales and Customer Service departments support all Brand customers. The extensive product offering includes six engine ranges with power outputs from 42 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32-ton GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path toward net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering and its strong R&D focus make FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.
