

FPT INDUSTRIAL HAS RECEIVED THE 2025 FUSO SUPPLIER AWARD IN THE PARTNERSHIP CATEGORY, IN RECOGNITION OF THE VALUE OF ITS COLLABORATION WITH MFTBC

Turin, Italy, May 14th, 2025

FPT Industrial, the Iveco Group brand dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications, has received the **2025 FUSO Supplier Award** in the Partnership category. Awarded by Mitsubishi Fuso Truck and Bus Corporation (MFTBC), part of Daimler Truck AG, it recognizes the outstanding value FPT Industrial delivers as a strategic supplier. This recognition came due to FPT Industrial's role in delivering technical solutions that ensure compliance with regulations across domestic and international markets. It is an achievement which reflects the brand's ongoing collaboration and commitment to maintaining clear, open, and proactive communication to promptly address any issues or changes.

Since the partnership commenced, **FPT Industrial has delivered over 650,000 F1C engines to Mitsubishi FUSO**; these power the **Canter**, a key model in the brand's vehicle line-up and an international best-seller in the light-duty truck segment sold in over 70 countries, as well as the **Rosa** minibuses.

PRESS RELEASE

Giovanni Crepaldi, Vice President, FPT Industrial Sales & Marketing, stated: *"Today we celebrate our long-standing partnership with Mitsubishi FUSO, part of Daimler Truck Asia, dating back to 2007. Since then, our engines have powered FUSO vehicles, enhancing their performance, efficiency and sustainability. Both FPT Industrial, as a global leader in engine manufacturing, and FUSO, as an icon in the Japanese commercial vehicles industry, have evolved as companies over the years, strengthening their positions in the market while continuing to focus on the excellence of their offerings. Along this parallel path, our collaboration has remained a constant. We are proud not only to supply FUSO, but to share with it our values and our vision of the present and the future of on-road transportation."*

Fabio Guerrisi, Head of On-Road Sales at FPT Industrial, commented: *"FUSO represents a crucial and valued customer for FPT Industrial within the on-road segment. In this partnership, we have leveraged our expertise and world-leading engine development capabilities to deliver solutions renowned for their power, reliability, robustness, and innovation, meeting the diverse needs and requirements of end users."*

The **F1C** is the flagship of FPT Industrial's F1 engine family, designed for light commercial vehicles and minibuses, with **over 5 million units sold since 2003**. FPT Industrial is the only manufacturer to offer two engines in this segment: alongside the 3-liter F1C – also available in a natural gas version – is the 2.3-liter **F1A**.

The **F1C** engine is the culmination of the brand's experience and heritage. Since its launch on the market, it has been conceived as a **global engine** – produced in FPT Industrial plants located in Europe, South America and Asia – **for a global customer base**. The strength of the F1C lies in its **"industrial DNA"**, which makes it a unique model in the market, as all other main engines in its category originate from passenger car derivatives.

With over two million units sold since 2003 and compliant with every emission standard, the F1C boasts **best-in-class performance**, with power outputs up to 152 kW (207 hp), together with the best transient response in its category thanks to electronically controlled variable geometry turbochargers (eVGT), delivering up to 470 Nm of torque at 1,400 rpm/min. Available for both transverse and longitudinal installation, the F1C can be customized on request, with options including radiator, air filter, oil pan, dipstick, alternator, and other components. The **ATS system with dual SCR**, optimized for urban missions with reduced load and low exhaust temperatures, as well as for suburban use, enables lower CO₂ emissions.

F1C for Mitsubishi FUSO vehicles – Technical Specifications

Displacement [liters]: 3

No. of Cylinders: 4

Maximum Power [kW]: 129 kW

Maximum Torque [Nm @ rpm]: 430 @ 1,600

Turbocharger: VGT

Service Life: up to 300,000 km Be10 on GVW up to 8.5 t

Dry Weight [kg]: 257

FPT Industrial is a brand of Iveco Group N.V. (EXM: IVG), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and ten R&D centers work for FPT Industrial all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department supports all Brand customers. The extensive product offering includes six engine ranges with power outputs from 30 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path towards net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.
