

FPT INDUSTRIAL TO SHOWCASE ITS LATEST INNOVATIONS FOR POWER GENERATION AT MIDDLE EAST ENERGY

Turin, Italy, April 7th, 2025

FPT Industrial, the Iveco Group brand dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications, will be heading to **Dubai** to exhibit at **Middle East Energy**, one of the most reputable and long-established events in the energy industry, being held from **April 7 to 9**. The brand will be present alongside its distributor network at Booth S2.C40, showcasing a selection of its offerings for the power generation segment.

Conscious of the responsibilities that come with being a leading manufacturer of engines, FPT Industrial continues to advance sustainability projects, a theme that is becoming increasingly central to the Brand's strategy and its engine lineup. This strong and unwavering commitment is also reflected in the way the Brand participates in trade shows around the world. As with all global events it attended in 2024, **FPT Industrial is proudly exhibiting at Middle East Energy 2025 with a carbon-neutral booth**. This ambitious practice encompasses every step of the booth's production and requires a Life Cycle Assessment (LCA), a "cradle-to-grave" approach that evaluates the cumulative potential environmental impacts of a product, process, or service.

As a trusted engine manufacturer, FPT Industrial stands at the forefront of the power generation industry, with over 30,000 units sold globally each year. The brand offers an extensive engine portfolio ranging from 2.4 to 16 liters, all of which comply with global emission standards, from the strictest to those in unregulated markets, ensuring superior performance across various applications. Whether used for stationary backup or mobile prime power, these engines are engineered to meet a broad range of power generation requirements, delivering reliability and efficiency.

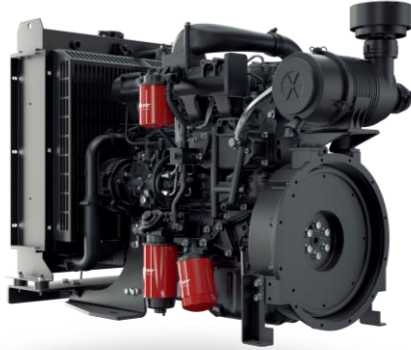

A LOOK AT THE POWER GENERATION RANGE: GUARANTEED RELIABILITY, PERFORMANCE, AND EFFICIENCY

The Brand's power generation line-up has seen a significant expansion over the past year, with the addition of two new engines to the dedicated range. The first is the **R24**, which was originally set to be announced during the previous edition of Middle East Energy, later canceled due to adverse weather conditions. The second, which will take center stage at this year's event, is the **R38**. This engine is a new 3.8 l turbocharged engine developed as a cost-effective solution for unregulated applications, designed for both power generation and industrial power unit line-ups and covering 50-60 kVA and 55-65 kW outputs, respectively.

The R38 features G-Drive, the brand's quick-to-market solution with cooling pack and filters already installed. It is equipped with a robust, proven and reliable mechanical injection system, while maintenance is facilitated and sped up thanks to the single-side servicing. For the power generation version, the R38 is switchable from 1,500 rpm to 1,800 rpm to minimize OEMs' stock requirements.

The flexibility that defines the R38 makes it ideally suited to a broad range of applications, from stationary backup to mobile prime power.

R38 Power Generation – Technical Specifications

Engine Displacement (liters): 3.8

Cylinder Arrangement: in-line 4

Standby Power (kVA): 59 – 70

Prime Power (kVA): 54 – 65

Emissions standard: UR

*Complete specifications are available on
FPT Industrial's website.*

At the booth, visitors will also have the opportunity to discover MyFPT products and services portfolio by **FPT Industrial Customer Service** supporting power generation solutions, including genuine spare parts, the FPT co-branded range of fluids developed in collaboration with Petronas Lubricants International, and the Connected Solutions.

Middle East Energy will provide a new opportunity for attendees to discover FPT Industrial's extensive distributor network: companies from all over the world standing by the brand as well as its customers, meeting their every need from engine purchases to maintenance. From long-established distributors to the newest additions, each member of the network plays a crucial role in keeping the brand's technological excellence and pure innovation at the service of customers.

***FPT Industrial** is a brand of Iveco Group N.V. (EXM: IVG), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and ten R&D centers work for FPT Industrial all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department supports all Brand customers. The extensive product offering includes six engine ranges with power outputs from 30 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path towards net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.*
