PRESS RELEASE

FPT DEBUTS AT THE 2026 PARTS & SERVICE WORLD TRADE FAIR

Turin, Italy, November 6th, 2026

FPT, the Iveco Group company dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications, is exhibiting at **Parts & Service World** for the first time. The biennial trade fair dedicated to the latest solutions in the areas of services, spare and wear parts, and store products for agricultural, construction, gardening and municipal technology, is being held at the **Messe Kassel (Kassel, Germany) from November 6 to 8, 2026**.

A premier industry leader, FPT is the **world's top independent producer of agricultural powertrains, equipping more than 110,000 vehicles annually**. Across markets like Europe, **FPT engines power one out of every three tractors and two out of five combine harvesters**.

These figures clearly explain why the Brand decided to take part in an event that this year will bring together over 220 exhibitors and a selected **audience of specialized workshops and end users**. Representatives of the **FPT Parts & Service department** will be available

at the stand **(Stand 43, Hall 12+13)**, not only to illustrate the products and services on display, but also and above all to demonstrate their availability to customers and their ability to meet their needs. FPT indeed **positions itself as an original spare parts and service solutions provider for the off-road segment**, either through the **availability of original spare parts for all its products**, or through digital and connected services that allow remote diagnostics and predictive maintenance interventions.

SOLUTIONS OF ALL SIZES

FPT's display will demonstrate how the Brand is able to **offer effective and efficient solutions to all kinds of maintenance, repair, and service requirements**.

The main attraction of the stand will be the recently and globally launched **F5 Long Block dedicated to off-road vehicles**. These engine assemblies fully meet FPT technical standards and quality specifications. They deliver a cost-effective repair and overhaul solution by enabling **original engine parts to be seamlessly transferred to the new unit**, **reducing total cost of ownership (TCO) without compromising repair quality**. This makes them an ideal solution for engine workshops: keeping these units in stock guarantees immediate availability, significantly **cutting vehicle downtime and boosting operational responsiveness**. A key advantage of the F5 Long Block is its **broad compatibility across a wider range of off-road engine configurations compared to a complete assembly**. This versatile single-source solution streamlines inventory management while delivering enhanced flexibility for end-users.

Learn more about our genuine parts offering on the FPT website.

PRESS RELEASE

FPT's stand will be completed by a wide range of genuine parts, such as filters, injectors, glow plugs, and parts kits.

Designed for all engine applications, **FPT genuine parts deliver superior quality and top-tier performance across all missions**. Covering everything from after-treatment system components and air management to timing, injection, complete engine replacements, and air compressor solutions, FPT's genuine parts portfolio continues to expand to meet growing market demands. Engineered to the highest manufacturing standards, each component ensures **maximum reliability, precision fit, and extended operational lifespan**. Backed by rapid global delivery and specialized technical assistance from FPT Authorized Workshops, FPT engines maintain peak efficiency and achieve up to 99% uptime.

***FPT** is a brand of Iveco Group N.V. (EXM: IVG), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and ten R&D centers work for FPT all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department support all Brand customers. The extensive product offering includes six engine ranges with power outputs from 30 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is advancing electric mobility solutions through the development of electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.*
