US ENVIRONVENTAL PROTECTION AGENCY and CALIFORNIA AIR RESOURCES BOARD
EMISSION CONTROL WARRANTY STATEMENT - YOUR WARRANTY RIGHTS AND OBLIGATIONS

FPT Industrial S.p.A. is pleased to explain the emission control system warranty on **[MY2027 through MY2029]** off-road/nonroad large spark-ignition engines. New off-road/nonroad large spark-ignition (LSI) engines must be designed, built and equipped to meet the stringent anti-smog standards. FPT Industrial S.p.A. must warrant the emission control system on your engine for the periods of time listed below provided there has been no abuse, neglect, or improper maintenance of your engine.

Your emission control system may include parts such as the carburetor, regulator or fuel-injection system, ignition system, engine computer unit (ECM), catalytic converter and air induction system. Also included may be hoses, belts, connectors, and other emission-related assemblies.

Where a warrantable condition exists, FPT Industrial S.p.A. will repair your off-road/nonroad large spark-ignition (LSI) engine at no cost to the ultimate purchaser and each subsequent purchaser including diagnosis, parts and labor.

MANUFACTURER'S WARRANTY COVERAGE:

The **[MY2027-MY2029]** off-road/nonroad large spark-ignition (LSI) engines are warranted for:

• 3 years or 2,500 hours of operation, whichever occurs first, **for Standard Components**
• 5 years or 3,500 hours of operation, whichever occurs first, **for High-Cost Components**

NOTE: *This warranty applies to all units operated in the United States or Canada.*

If any emission-related part on your engine is defective, the part will be repaired or replaced by FPT Industrial S.p.A**.**

OWNER'S WARRANTY RESPONSIBILITIES

- As the off-road/nonroad large spark-ignition (LSI) engine owner, you are responsible for the performance of the required maintenance listed in your owner's manual. FPT Industrial S.p.A. recommends that you retain all receipts covering maintenance on your off-road/nonroad large spark-ignition (LSI) engine, but FPT Industrial S.p.A. cannot deny warranty solely for the lack of receipts or for your failure to ensure the performance of all scheduled maintenance.
- As the off-road/nonroad large spark-ignition (LSI) engine owner, you should however be aware that FPT Industrial S.p.A. may deny you warranty coverage if your off-road/nonroad engine or a part has failed due to abuse, neglect, improper maintenance or unapproved modifications.
- Your engine is designed to operate only on a specific fuel. Use of any other fuel may result in your engine no longer operating in compliance with emissions requirements.
- You are responsible for initiating the warranty process. FPT Industrial S.p.A. suggests that you present your off-road/nonroad large spark-ignition (LSI) engine to an FPT Dealer as soon as a problem exists. The warranty repairs should be completed by the dealer as expeditiously as possible.

FPT Industrial S.p.A. will not deny emission-related warranty claims based on:

- Maintenance or other service an authorized facility performed.
- Engine/equipment repair work that an operator performed to correct an unsafe, emergency condition attributable to FPT Industrial S.P.A, as long as the operator tries to restore the engine/equipment to its proper configuration as soon as possible.
- Any action or inaction by the operator unrelated to the warranty claim.
- Maintenance that was performed more frequently than FPT Industrial S.P.A specifies.
- Anything that is FPT Industrial S.p.A.'s fault or responsibility.
- The use of any fuel that is commonly available where the equipment operates unless FPT Industrial S.p.A.'s written maintenance instructions state that this fuel would harm the equipment's emission control system and operators can readily find the proper fuel.

Emissions warranty may not be covered for the following reasons:

- FPT Industrial S.p.A may deny warranty claims only for failures that have been caused by the owner's or operator's improper maintenance or use, by accidents for which FPT Industrial S.p.A has no responsibility, or by acts of God. FPT Industrial S.p.A may deny claims for failures that have been directly caused by the operator's abuse of the engine/equipment or the operator's use of the engine/equipment in a manner for which it was not designed and are not attributable to FPT Industrial S.p.A in any way.

- FPT Industrial S.p.A. is not responsible for failures resulting from improper repair or the use of parts that are not certified.

If you have any questions regarding your warranty rights and responsibilities, please contact the North American FPT Technical Service Group at **(833) 458-1378** or email: **fpt-na-warranty@fptindustrial.com**.

Key Source: 40 CFR § 1068.115

COMPONENT COVERAGE

New engines certified for sale and registered will have the following items covered by the emission warranty, depending on the emission level of the off-road/nonroad engine, if the items were first installed on the new off-road/nonroad engine as original equipment:

EMISSION CONTROL WARRANTY PARTS LIST (if applicable to engine)

Fuel injection system
- Fuel injector
- Common fuel rail
- CNG pressure regulator

Ignition system
- Spark plug
- Ignition coil
- Main wiring harness

Air induction system
- Intake manifold
- Turbocharger
- Charge air cooler
- Boost diverter valve
- Throttle valve
- Exhaust manifold

Positive Crankcase Ventilation (PCV) system
- PCV valve
- PCV element
- Oil fill cap

Exhaust after treatment devices
- Three-Way Catalyst (TWC)

Cold Start Enrichment system

Electronic Control Units, Ignition Modules, Sensors, Solenoids, and Wiring harnesses used in above components

Miscellaneous items used in above components, such as pulleys, idlers, hoses, belts, connectors, tubing, gaskets, and mounting hardware
